OUR CLIENT

A multinational enterprise was seeking to revolutionise its cybersecurity landscape.

The complex nature of the Group's diverse companies presented unique challenges, including streamlining legacy systems, building a robust strategy from the ground up, and addressing historical data management issues.

OUR GOALS

Transform the cybersecurity operations and leadership, ensuring a secure and resilient digital environment.

Ensure services run smoothly and legacy issues are resolved within many platforms.

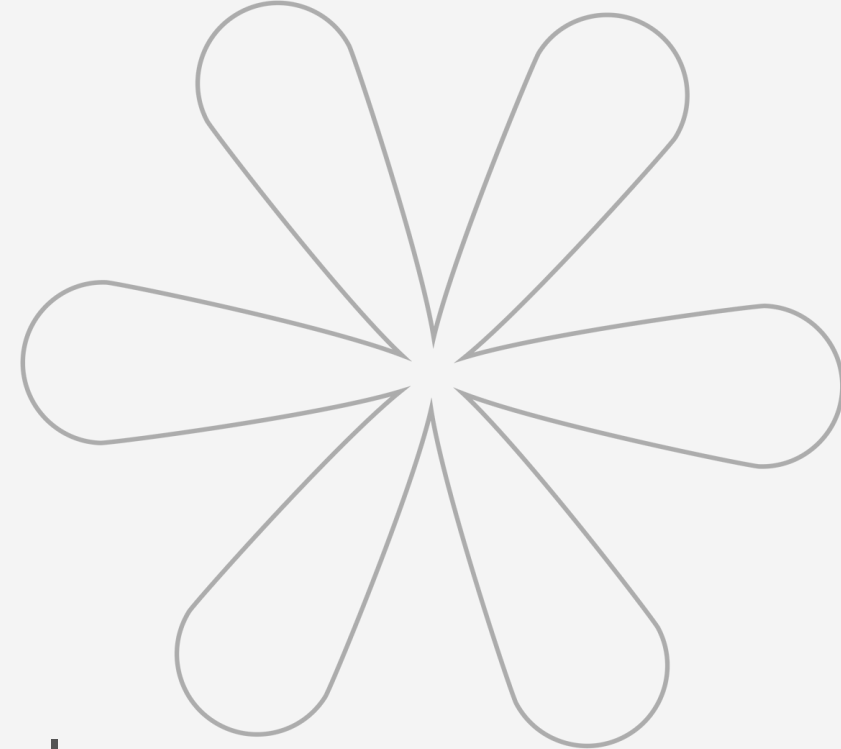

Ensure the 20+ entities of the Group are involved equally.

CUSTOMER SUCCESS

Transformation Journey: Enhancing
Cybersecurity Leadership and Operations

OUR APPROACH

Align the Board and the relevant stakeholders on a robust plan and a combination of strategic and tactical solutions.

Complete a Group-wide assessment of existing and underused solutions and practices to identify opportunities and request training.

OUR RESULTS

- ✔ IT systems were upgraded, historical governance issues were addressed, and risk management processes were enhanced.
- ✔ Our efforts resulted in smoother customer interactions and a consolidated relationship
- ✔ We also supported recruiting new talent and fostered a Group-wide community of practice.
